AMENDMENTS TO THE CLAIMS:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (CURRENTLY AMENDED) An information processor comprising:

a control information retrieving part retrieving control information that is used to execute a program;

a destination defining part defining destination address information that is indicated by a user and a location different from a current location where the program is stored;

a moving part moving the program in accordance with the destination address information, wherein said moving part comprises:

a copying part retrieving the current address information corresponding to said definition name included in said control information in accordance with said definition information and copying all information, which is stored at a current address indicated by the current address information, in accordance with the destination address information; and

a deleting part deleting all information stored at the current address including the program; and

a control information changing part changing the control information based on the destination address information.

2. (ORIGINAL) The information processor as claimed in claim 1, wherein said control information comprises current address information indicating where the program is stored in a storage device, and

wherein said control information changing part comprises a replacing part replacing the current address information with the destination address information to which the program is moved.

3. (ORIGINAL) The information processor as claimed in claim 1, wherein said control information is generated when said program is installed into a storage device.

4. (ORIGINAL) The information processor as claimed in claim 1, wherein said

control information is referred to when said program is executed.

5.　　(ORIGINAL)　The information processor as claimed in claim 1, wherein said control information is stored in a file referred to by other programs, and the file includes a plurality of control information to execute the other programs.

6.　　(ORIGINAL)　The information processor as claimed in claim 1, wherein said control information comprises definition information including at least one destination address information related to the program and including at least one definition name uniquely assigned to the destination address information, and

wherein said control information changing part comprises a changing part changing said control information based on said definition information.

7.　　(PREVIOUSLY AMENDED) The information processor as claimed in claim 1, wherein said control information comprises:

current address information indicating where the program is stored in a storage device;

definition information including at least one destination address information related to the program and including at least one definition name uniquely assigned to the destination address information,

wherein said control information changing part comprises:

a changing part changing the current address information included in said control information based on the destination address information included in said definition information.

8.　　(ORIGINAL)　The information processor as claimed in claim 1, wherein said control information comprises:

program information to execute the program; and

data information related to data created or edited by executing said program, and

wherein said moving part comprises:

a program moving part moving the program; and

a data moving part moving the data when the program is moved by said program moving part.

9.　　(ORIGINAL)　The information processor as claimed in claim 1, further comprising

3

an installing part installing said program.

10. (CURRENTLY AMENDED) A method for processing information comprising:

retrieving control information that is used to execute a program;

defining destination address information that is indicated by a user and a location different from a current location where the program is stored;

moving the program in accordance with the destination address information, wherein said moving comprises:

retrieving the current address information corresponding to said definition name included in said control information in accordance with said definition information;

copying all information, which is stored at a current address indicated by the current address information, in accordance with the destination address information; and

deleting all information stored at the current address including the program; and

changing the control information based on the destination address information.

11. (PREVIOUSLY AMENDED) The method as claimed in claim 10, wherein said control information includes current address information indicating where the program is stored in a storage device, and

wherein said changing comprises replacing the current address information with the destination address information to which the program is moved.

12. (ORIGINAL) The method as claimed in claim 10, wherein said control information is generated when said program is installed into a storage device.

13. (ORIGINAL) The method as claimed in claim 10, wherein said control information is referred to when said program is executed.

14. (ORIGINAL) The method as claimed in claim 10, wherein said control information is stored in a file referred to by other programs, and the file includes a plurality of control information to execute the other programs.

15. (PREVIOUSLY AMENDED) The method as claimed in claim 10, wherein said control information comprises definition information including at least one destination address

information related to the program and including at least one definition name uniquely assigned to the destination address information, and

wherein said changing comprises changing said control information based on said definition information.

16.   (PREVIOUSLY AMENDED) The method as claimed in claim 10, wherein said control information comprises:

current address information indicating where the program is stored in a storage device;

definition information including at least one destination address information related to the program and including at least one definition name uniquely assigned to the destination address information,

wherein said changing comprises:

changing the current address information included in said control information based on the destination address information included in said definition information.

17.   (PREVIOUSLY AMENDED) The method as claimed in claim 10, wherein said control information comprises program information to execute the program and data information related to data created or edited by executing said program, and

wherein said moving comprises:

moving the program; and

moving the data when the program is moved.

18.   (PREVIOUSLY AMENDED) The method as claimed in claim 10, further comprising installing said program.

19.   (CURRENTLY AMENDED) A computer readable recording medium recorded with a program code for causing a computer to process information, said program code comprising the codes for:

retrieving control information that is used to execute a program;

defining destination address information that is indicated by a user and a location different from a current location where the program is stored;

moving the program in accordance with the destination address information, wherein said code for moving comprises the codes for:

5

retrieving the current address information corresponding to said definition name included in said control information in accordance with said definition information;

copying all information, which is stored at a current address indicated by the current address information, in accordance with the destination address information; and

deleting all information stored at the current address including the program; and

changing the control information based on the destination address information.

20.   (PREVIOUSLY AMENDED) The computer-readable recording medium as claimed in claim 19, wherein said control information includes current address information indicating where the program is stored in a storage device, and

wherein said code for changing comprises code for replacing the current address information with the destination address information to which the program is moved.

21.   (ORIGINAL) The computer-readable recording medium as claimed in claim 19, wherein said control information is generated when said program is installed into a storage device.

22.   (ORIGINAL) The computer-readable recording medium as claimed in claim 19, wherein said control information is referred to when said program is executed.

23.   (ORIGINAL) The computer-readable recording medium as claimed in claim 19, wherein said control information is stored in a file referred to by other programs and the file includes a plurality of control information to execute the other programs.

24.   (PREVIOUSLY AMENDED) The computer-readable recording medium as claimed in claim 19, wherein said control information comprises definition information including at least one destination address information related to the program and including at least one definition name uniquely assigned to the destination address information, and

wherein said code for changing comprises the code for changing said control information based on said definition information.

25.   (PREVIOUSLY AMENDED) The computer-readable recording medium as claimed in claim 19, wherein said control information comprises:

current address information indicating where the program is stored in a storage device;

definition information including at least one destination address information related to the program and including at least one definition name uniquely assigned to the destination address information,

wherein said code for changing comprises the code for:

changing the current address information included in said control information based on the destination address information included in said definition information.

26.   (PREVIOUSLY AMENDED) The computer-readable recording medium as claimed in claim 19, wherein said control information comprises program information to execute the program and data information related to data created or edited by executing said program, and

wherein said code for moving comprises the codes for:

moving the program; and

moving the data when the program is moved.

27.   (ORIGINAL) The computer-readable recording medium as claimed in claim 19, further comprising the code for installing said program.
